- Our buildings are manufactured and prefabricated in Yalesville, CT, a facility which is a PCI and NPCA certified, with over 50 years of experience.
- United Concrete offers both standard size and custom design to meet the needs of your project.
- Our buildings are inspected by a national third party agency. A licensed professional engineer stamps all calculations and drawings.
- Our buildings ship complete with all mechanical and electrical equipment installed which reduces the onsite labor cost.
- United precast buildings are fully functional with hardware and equipment directly mounted onto the 4" solid concrete walls, which insures that they will be vandal resistant and low maintenance.
- Our buildings are designed to aesthetically fit into any surrounding landscape.
- Many exterior finishes are available.
- We offer three different roof options.
  1. Sloped concrete roof
  2. Wood truss hip roof
  3. Gable wood truss roofing system with 30-year architectural shingles
